

## **Release Notes for Version 5.6.0.115**

### FIXES AND CORRECTIONS

1. Corrected problem in Repair Orders where an error would occur viewing repair orders if you are using the Material Handlers function.
2. Corrected a problem in Accounts Payable where the credits used on a payment would not appear on the remittance stub.

### ENHANCEMENTS AND IMPROVEMENTS

1. Sedona Document Types dropdown list is now sorted.
2. Added support for a dual quantity column export format to Bridgestone export. This option requires special setup on your account with Bridgestone. If you wish to use this format please contact, Bridgestone prior to exporting files in this format.
3. Added a new invoice form "Custom Form (CS24)" that supports dual quantity columns for Quantity based RMR.
