

SedonaSchedule - Document Overview

SedonaSchedule, previously known as SedonaService, incorporates the scheduling, dispatching and management of Ticket and Job Appointments. All scheduling may now be performed within SedonaSchedule. The Job Schedule Board and the Jobs Appointment Summary will be retired in the near future.

When scheduling Job Appointments, you have the ability to schedule one appointment for one Installer or multiple appointment dates for one or multiple installers, all from the new Job Appointment form. Job Appointments may be dragged to a different Installer on the same day, or may easily be re-scheduled by editing the appointment from the Schedule Board.

Job Appointments may be dispatched directly from the Schedule Board in a “Live Dispatch” mode, or may be dispatched manually by office staff.

A Job Listing is now available to view all open Jobs or Jobs that are not currently scheduled. The Job Listing may be sorted and filtered using the same type of functionality that is employed in the Ticket Queue.

This document is being provided to explain how to use the new features of SedonaSchedule, which is available as of SedonaOffice version 5.6.200.

Setup & Changes

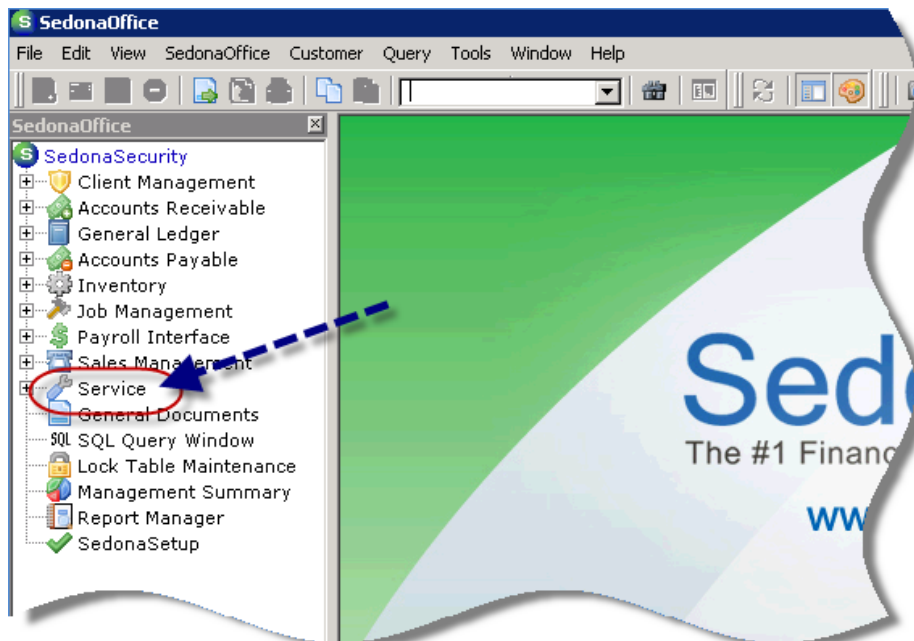

Setup & Changes

Display Group Setup

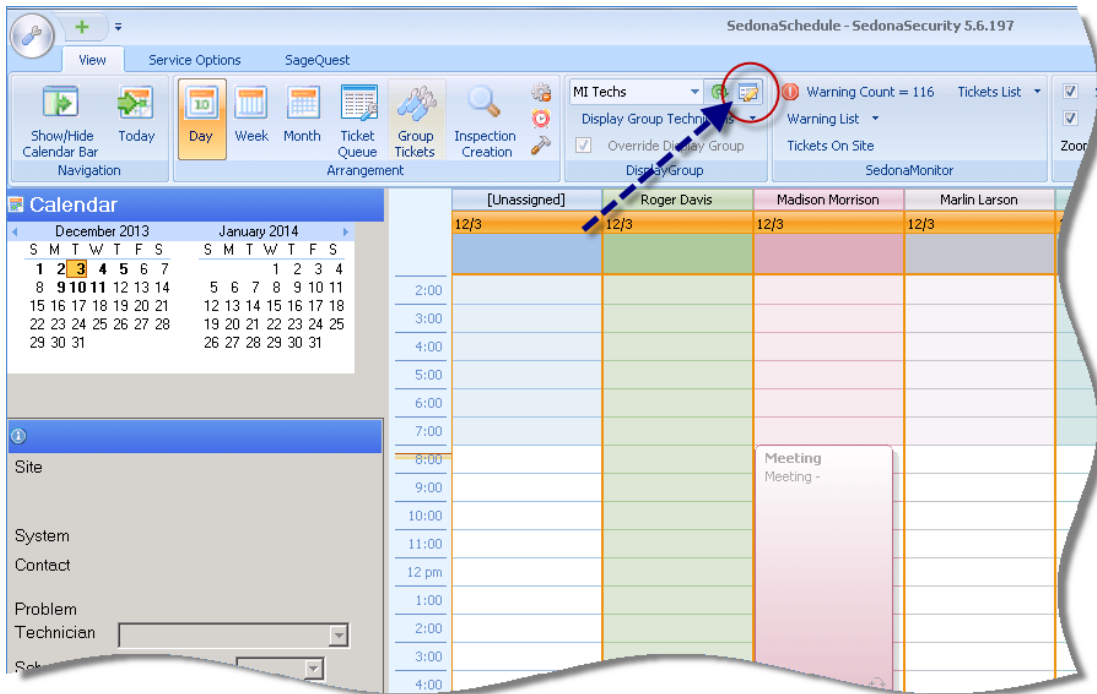

If your company's Installers work exclusively on Jobs, you are using Job Appointments or the Job Schedule Board, and you currently do not have your Installers included in any Display Group on the SedonaSchedule [formerly *SedonaService*] Board, you will need to either create a new Display Group or include your Installers in an existing Display Group.

To create a new *Display Group* for your Installers, follow the steps below and on the following pages.

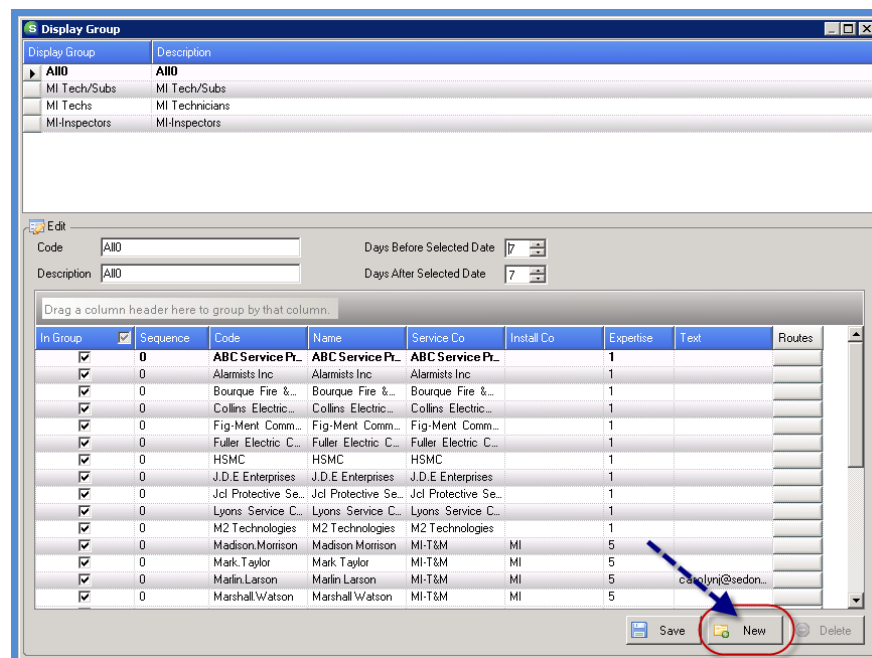

1. Open *Service* from the main SedonaOffice menu.

2. SedonaSchedule will be displayed. Click on the *Display Group Edit* button on the Ribbon.

3. The *Display Group* form will be displayed. Click on the *New* button at the lower right of the form.

- In the Code field, enter the name of the new Display Group. In the Technician/Installer name list, check the box to the left of each Installer to be included in the group that will display on the scheduling board. When finished, click the Save button and close out of the Display Group edit.

Save New Delete

- You will be returned to the SedonaSchedule board. Click on the drop-down arrow in the Display Group selection field and select your new Installers Display Group.

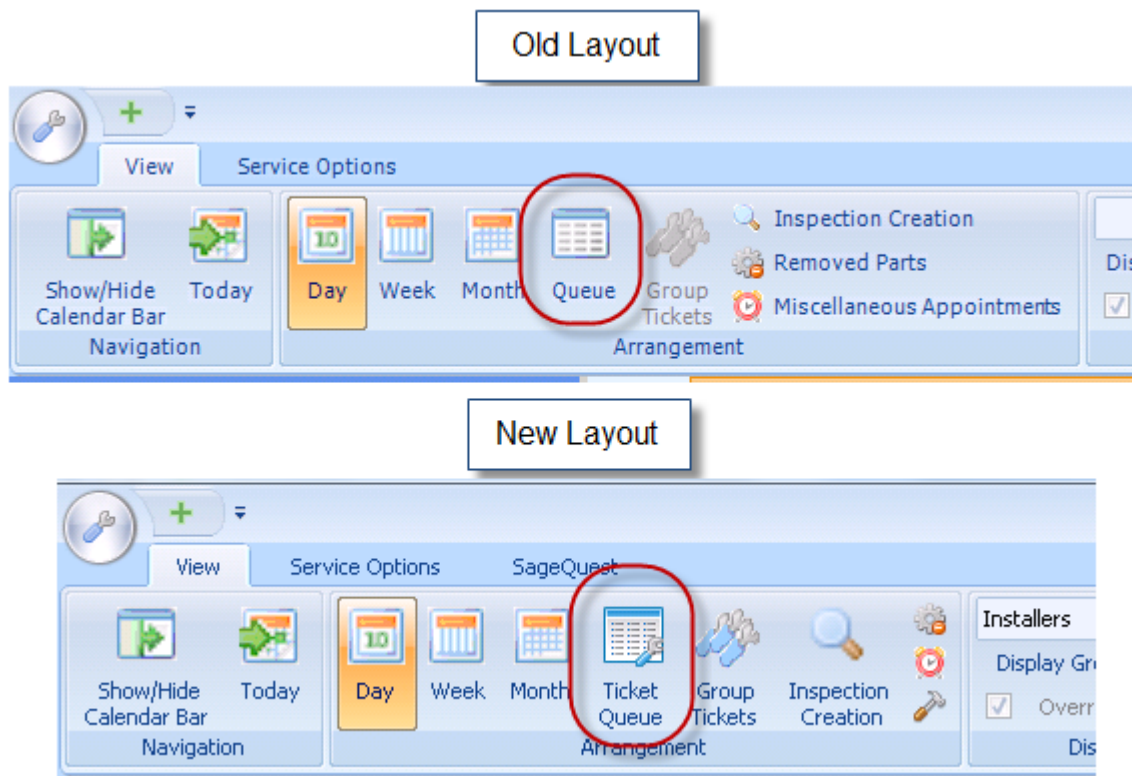

- The Scheduling board will refresh with the Installer names that were assigned to the Display Group.

Additions/Changes to the Ribbon

A few changes have been made to the main ribbon to enable the Job Scheduling/Management functions.

- The button previously named Queue is now labeled **Ticket Queue**. The functionality of this button has not changed.

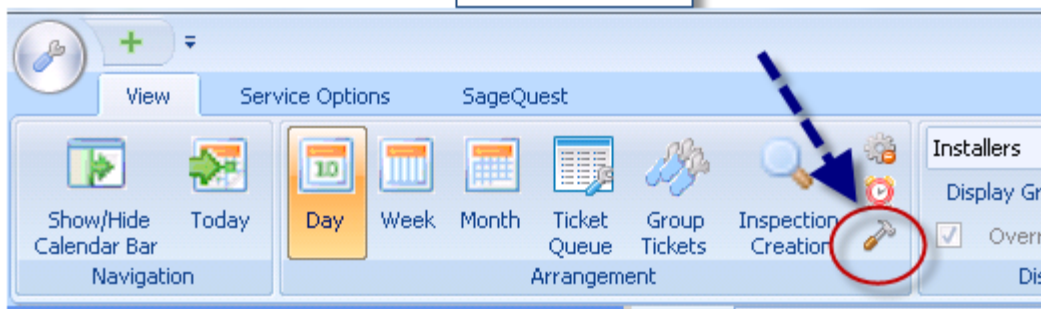

- A new button has been added to the Arrangement group of the ribbon  icon. Clicking on this button will open your **Open Jobs List**.

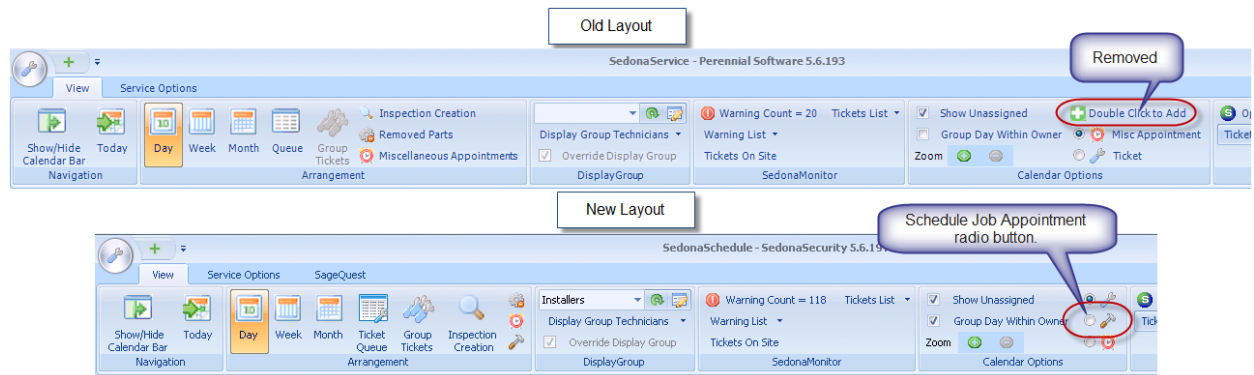

Old Layout

New Layout

- On the Calendar Options group of the ribbon, the “Double Click to Add” information has been removed, and a new radio button  has been added for creating Job Appointments.

Functionality

Job Scheduling/Viewing Functionality

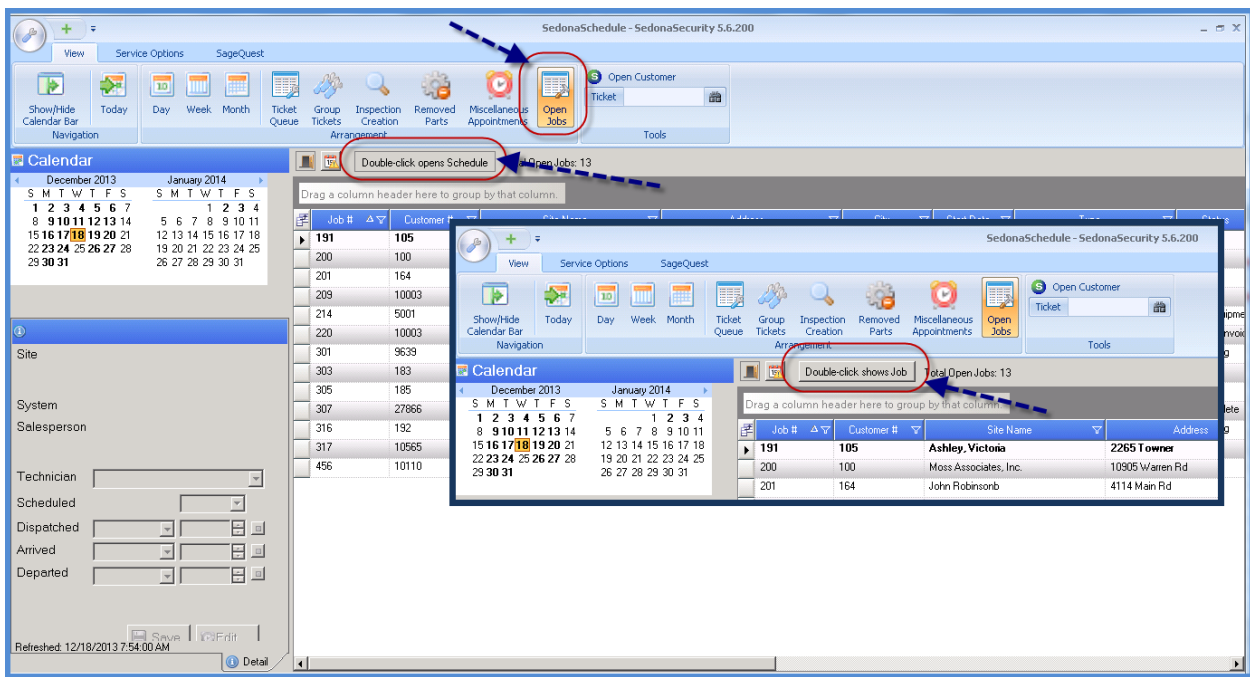

Open Job List

The Open Job List is accessed by clicking on the  icon located in the Arrangement group of the Ribbon. After clicking on the Hammer icon, the Open Job List will be displayed. On the Ribbon, the Hammer icon will change to a button labeled Open Jobs as shown in the screen shot below. Returning to the Schedule Board will change the Open Jobs button back to the Hammer icon.

Located at the top of the Open Jobs List is a toggle button; clicking on the button will change the functionality when double-clicking on a Job within the list. The toggle button when clicked will display as “Double-click Opens Schedule” or “Double-click Shows Job”.

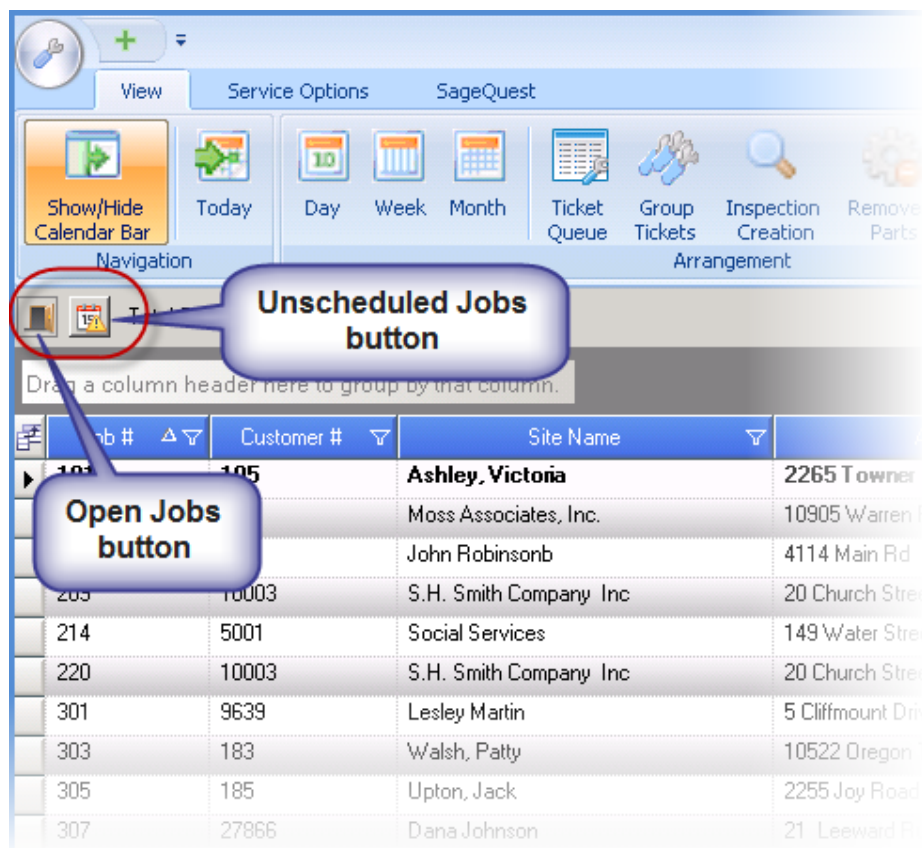

When the Toggle button is set to “Double-click Opens Schedule”, when double-clicking on a Job within the Open Jobs List, the Job Appointment Scheduling form will be displayed. When the Toggle button is set to “Double-click Shows Job”, when double-clicking on a Job within the Open Jobs List, the SedonaOffice icon on your windows task bar will begin to blink; this indicates the Job record has been opened in the main SedonaOffice application. Click on the SedonaOffice icon on the task bar to view the Job record.

Job List Views

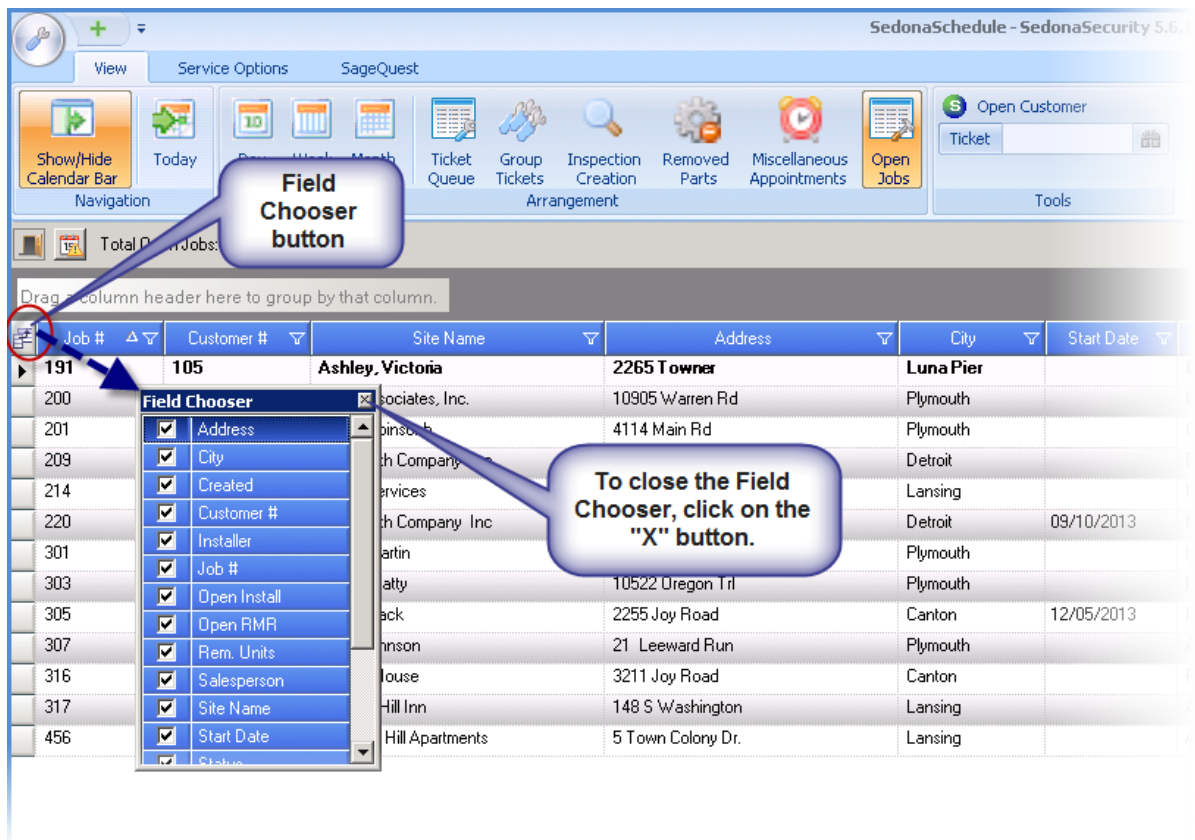

There are two pre-defined views of the Job List; *Open Jobs* and *Unscheduled Jobs*. The Open Jobs view will contain all Jobs that have not been closed in the main SedonaOffice application. The Unscheduled Jobs view will contain any Jobs without any un-dispatched Job Appointments.

You may toggle back and forth between views by clicking on the buttons above the Job List column names.

Job List Configuration

The Job List contains a Field Chooser which allows each User to select which columns are displayed. Columns may also be rearranged by dragging the column header title and dropping at the desired location. Any changes made with the Field Chooser or rearranging columns will be remembered the next time the User logs into the application.

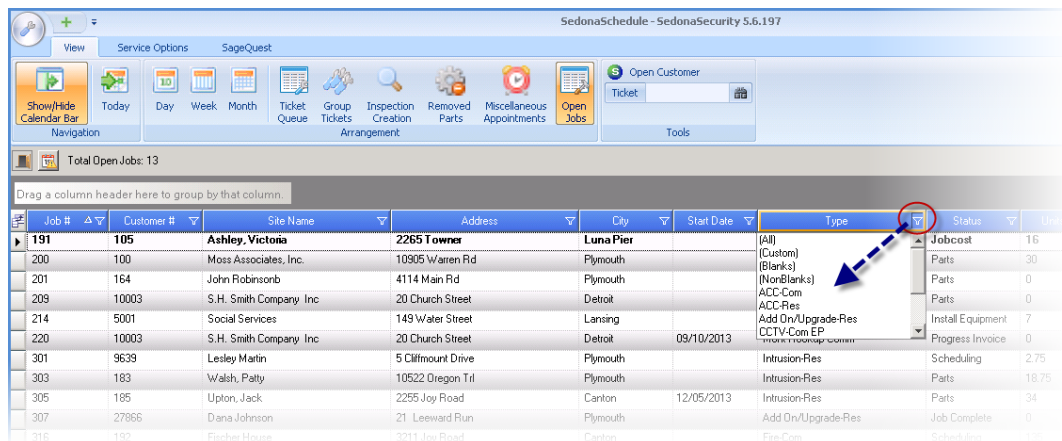

Job List Filters

The Job List may be filtered based on any of the displayed columns within the Job List. There are three ways to use Filters; using *Drop-Down Filters*, *Filter Groups* or *Custom Filters*. Each filtering option will be described below.

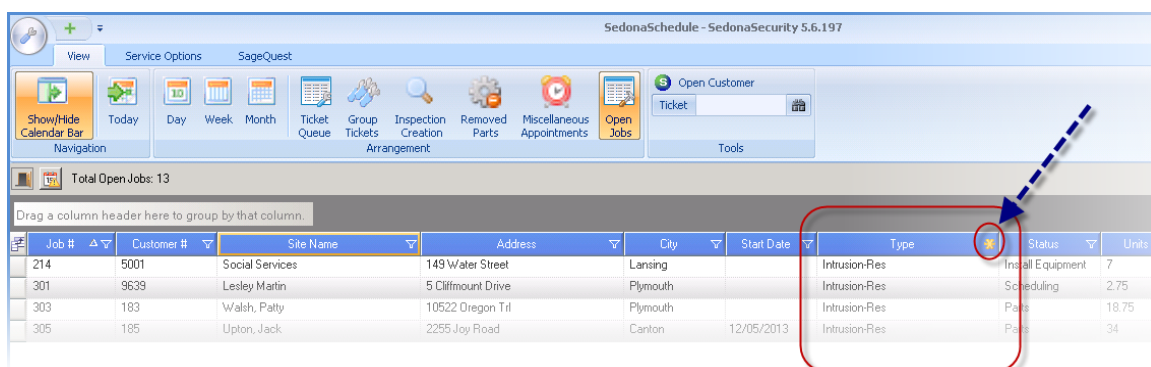

Drop-Down Filters

Within the Job List, in the header of each column is a filter  button. Clicking on the filter button will display a list of all the possible values based on all Jobs currently displayed in the list.

For example, you want to view Jobs for one particular Job Type, click on the filter button, and then click on the desired Job Type. The Job List will refresh with the Jobs of the selected Job Type.

Any column within the Job List that contains a current Filter selection will display a  star symbol instead of the Filter cone symbol. To remove a Filter selection, click on the Star symbol and select "All" from the drop-down list.

Filter Groups

Within the Job List, you may view the Jobs in *Filter Groups*. When using Filter Groups the view of the Job List changes to a tree structure. After creating a Filter Group, each line displayed within the Job List may be expanded to show the Jobs that belong to that filter group.

To create a Filter Group, drag and drop the desired field to the gray Filter Bar located above the field name areas of the Job List.

To remove a filter and return to the Job List, drag the Filter name displayed in the gray filter bar down into the list of tickets.

Custom Filters

Within the Job List, in the header of each field is a filter button. Within the Filter Drop-Down list is the *Custom* option. The Custom option provides several ways to define what Jobs you wish to be displayed.

When selecting the *Custom*, from the drop-down list within a particular field of the ticket queue, the *Custom Filter* form will be displayed. This form allows the User to select an *Operator* and a *Value* for the application use to determine which Jobs to display in the list.

An *Operator* is a search condition and a *Value* is specifically what you want to see.

Example: The City field in the Job List is selected for a Custom filter. We want to see all Jobs where the site City is Plymouth or Canton. To produce a list of Jobs that meet this requirement, we need to create two rows of conditions and set the *Filter Based On* option to *Any*; which means that the rows of conditions entered can apply to any Job.

For the first condition row, in the Operator field, we selected Equals and in the Value field we selected Plymouth. For the second condition row, in the Operator field, we selected Equals and in the Value field we selected Canton.

The screenshot shows the SedonaSchedule - SedonaSecurity 5.6.197 application window. The main area displays a table of jobs with columns: Job #, Customer #, Site Name, Address, City, Start Date, Type, and Status. A red circle highlights the filter button in the City column header. A 'Custom Filter' dialog box is open, showing the 'Filter based on' dropdown set to 'All' and the 'of the following conditions:' section. The first condition row shows 'Any' in the 'Filter based on' dropdown, 'City' in the 'Value' field, and 'Equals' in the 'Operator' field. The second condition row shows 'Any' in the 'Filter based on' dropdown, 'City' in the 'Value' field, and 'Equals' in the 'Operator' field. The 'Value' field for the second condition is set to 'Canton'. The 'OK' and 'Cancel' buttons are at the bottom of the dialog.

Job Appointments

Job Appointments may be created from either the Job List or the Schedule Board. Job Appointments may be created for:

- a single employee on a single day
- a single employee for multiple days
- multiple employees on a single day
- multiple employees on multiple days

Scheduling a Job Appointment from the Job List or the Schedule Board will be described within this topic heading.

Job Scheduling Form Definitions

Before scheduling a Job Appointment, it is important to understand the layout and functionality of the Job Scheduling form.

The Job Schedule form is divided into four main areas; each of which is described below and on the following pages.

- **Job Information** – this area will display the following information for the selected Job:
 - Job number
 - Job type
 - Current job status
 - Customer number and Customer name
 - Site name, address and phone number
 - Job hours information
 - Total Estimated Labor Hours
 - [Total] Hours Used
 - Proposed Hours [what is currently being scheduled]
 - Remaining Labor Units (Estimated minus Completed)

Scheduling a Job from the Job List (continued)

8. You may now view the scheduled Job Appointments on the Schedule Board.

The screenshot displays the SedonaSchedule - SedonaSecurity 5.6.200 application window. The interface includes a top menu bar with options like View, Service Options, and SageQuest. Below this is a toolbar with icons for Show/Hide Calendar Bar, Today, Day, Week, Month, Ticket Queue, Group Tickets, Inspection Creation, and MI Techs. A central area shows a calendar for December 2013 and January 2014, with a sidebar for job details including Site, System, Contact, Problem, Technician, Scheduled, Dispatched, Arrived, and Departed. The main schedule board is a grid showing appointments for two technicians, Mark Taylor and Marshall Watson, across dates 12/30, 12/31, 1/1, 1/2, and 1/3. The grid is color-coded by day (green for weekdays, pink for weekends). Appointments are listed as 'JOB 316 - Fire-Com (Scheduling) Canton Fischer House' and 'TKT 2449 - Insp-Fire-MD (Critical) Livonia Livonia High'. The bottom status bar shows the current time as 7:17 PM on 12/17/2013.

Scheduling a Job from the Schedule Board

To schedule a single or multiple Job Appointments from the *Schedule Board*, follow the steps below and on the following pages.

1. From the main Ribbon, click on the  Job [double-click to add] icon. Within the *Calendar*, click on the date on which the Job Appointment will be scheduled. Within the *Schedule Board* double-click on the desired employee & time slot.

The screenshot displays the SedonaSchedule - SedonaSecurity 5.6.200 application. The main window features a ribbon with icons for navigation and scheduling. On the left, there is a calendar view for December 2013 and January 2014. The central area is the Schedule Board, which is a grid with columns for different employees (Marlin Larson, Mark Taylor, Marshall Watson, Mike McKenzie, Mike Walker, Madison Morrison) and rows for time slots (from 12:00 to 11:00). A callout bubble with the text "Double-click on the desired Employee column and time slot" points to the intersection of the Mark Taylor column and the 8:00 time slot. This intersection contains a job entry: "JOB 316 - Fire-Com (Scheduling) Canton Fischer House @3211 Joy". Other job entries are visible, such as "JOB 303 - Intrusion-Res (Parts) Plymouth Walsh, Patty @10522" and "JOB 307 - Add". The bottom of the window shows a status bar with "Refreshed: 12/18/2013 6:39:26 AM" and buttons for "Unscheduled (0)" and "Detail".

Scheduling a Job from the Schedule Board (continued)

- The Select a Job to Schedule list will be displayed. You may either type in the Job Number in the field at the top of the list and press the Enter key, or Double-Click on the Job within the list of Jobs displayed.

Scheduling a Job from the Schedule Board (continued)

6. You may now view the scheduled Job Appointment on the Schedule Board.

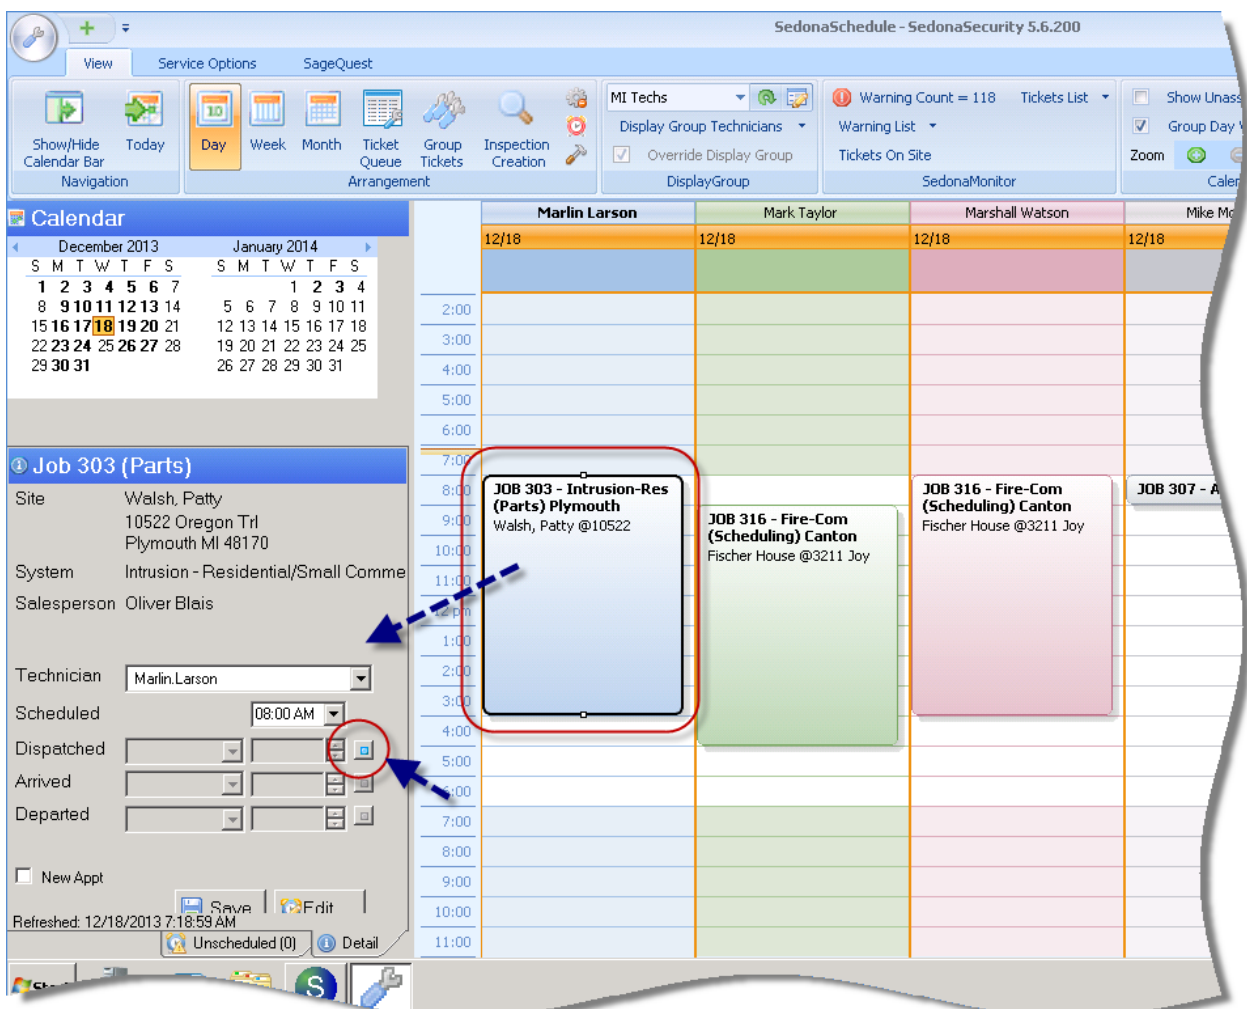

Job Appointment Dispatching

Job Appointments may be Live Dispatched or Dispatch times may be entered manually; both methods will be covered within this topic.

Live Dispatching

To Live Dispatch a Job Appointment, follow the steps below.

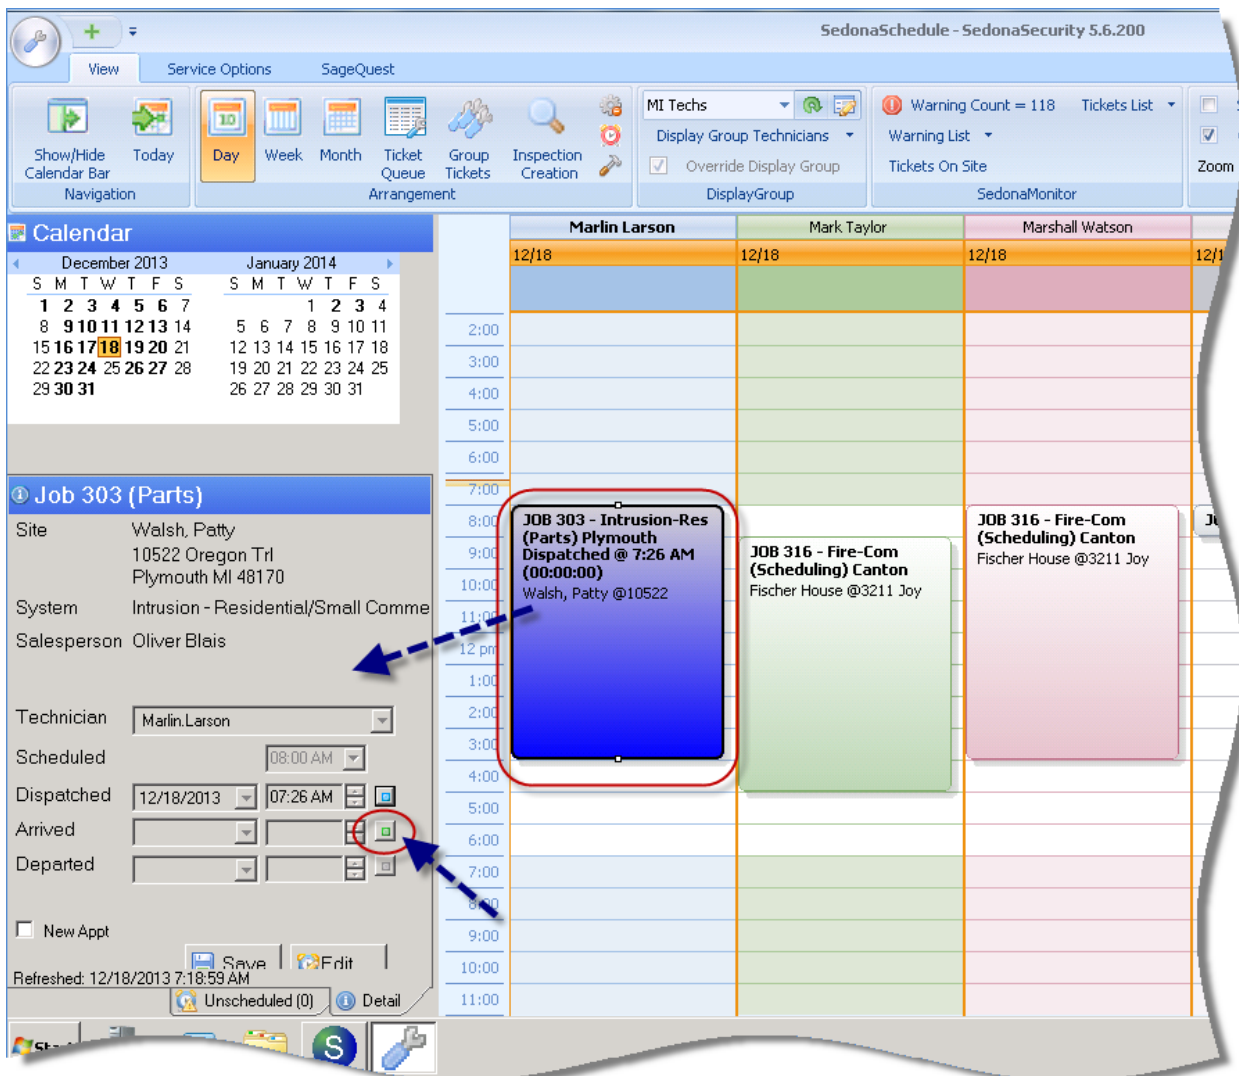

1. From the Schedule Board, click on the Job Appointment to be dispatched. The Job information will be displayed in the Information Viewer to the left. When the employee is on his way to the appointment, click on the  blue dispatch button.

The screenshot displays the SedonaSchedule software interface. On the left, a calendar shows the transition from December 2013 to January 2014. Below the calendar, the 'Job 303 (Parts)' details are visible, including the site 'Walsh, Patty' and the technician 'Marlin, Larson'. The 'Dispatched' field is highlighted with a red circle, and a blue arrow points to the blue dispatch button (a small blue square with a white 'D') located next to it. The main area of the interface is a schedule board with columns for technicians: Marlin Larson, Mark Taylor, Marshall Watson, and Mike Mo. The schedule board shows a grid of time slots from 12:00 to 11:00. A red box highlights the 'JOB 303 - Intrusion-Res (Parts) Plymouth' appointment for Marlin Larson at 12:00. Other appointments visible include 'JOB 316 - Fire-Com (Scheduling) Canton' for Mark Taylor and 'JOB 316 - Fire-Com (Scheduling) Canton' for Marshall Watson.

Live Dispatching (continued)

- Once the employee has arrived at the Job site, from the Schedule Board, click on the Job Appointment to be dispatched and then click on the  green dispatch button.

The screenshot displays the SedonaSchedule - SedonaSecurity 5.6.200 interface. The top menu bar includes 'View', 'Service Options', and 'SageQuest'. Below this is a toolbar with icons for 'Show/Hide Calendar Bar', 'Today', 'Day', 'Week', 'Month', 'Ticket Queue Arrangement', 'Group Tickets', 'Inspection Creation', 'MI Techs', 'Display Group Technicians', 'Warning Count = 118', 'Tickets List', 'Warning List', 'Tickets On Site', and 'Zoom'. The main area is divided into three sections: a calendar on the left, a job details panel on the bottom left, and a dispatch board on the right.

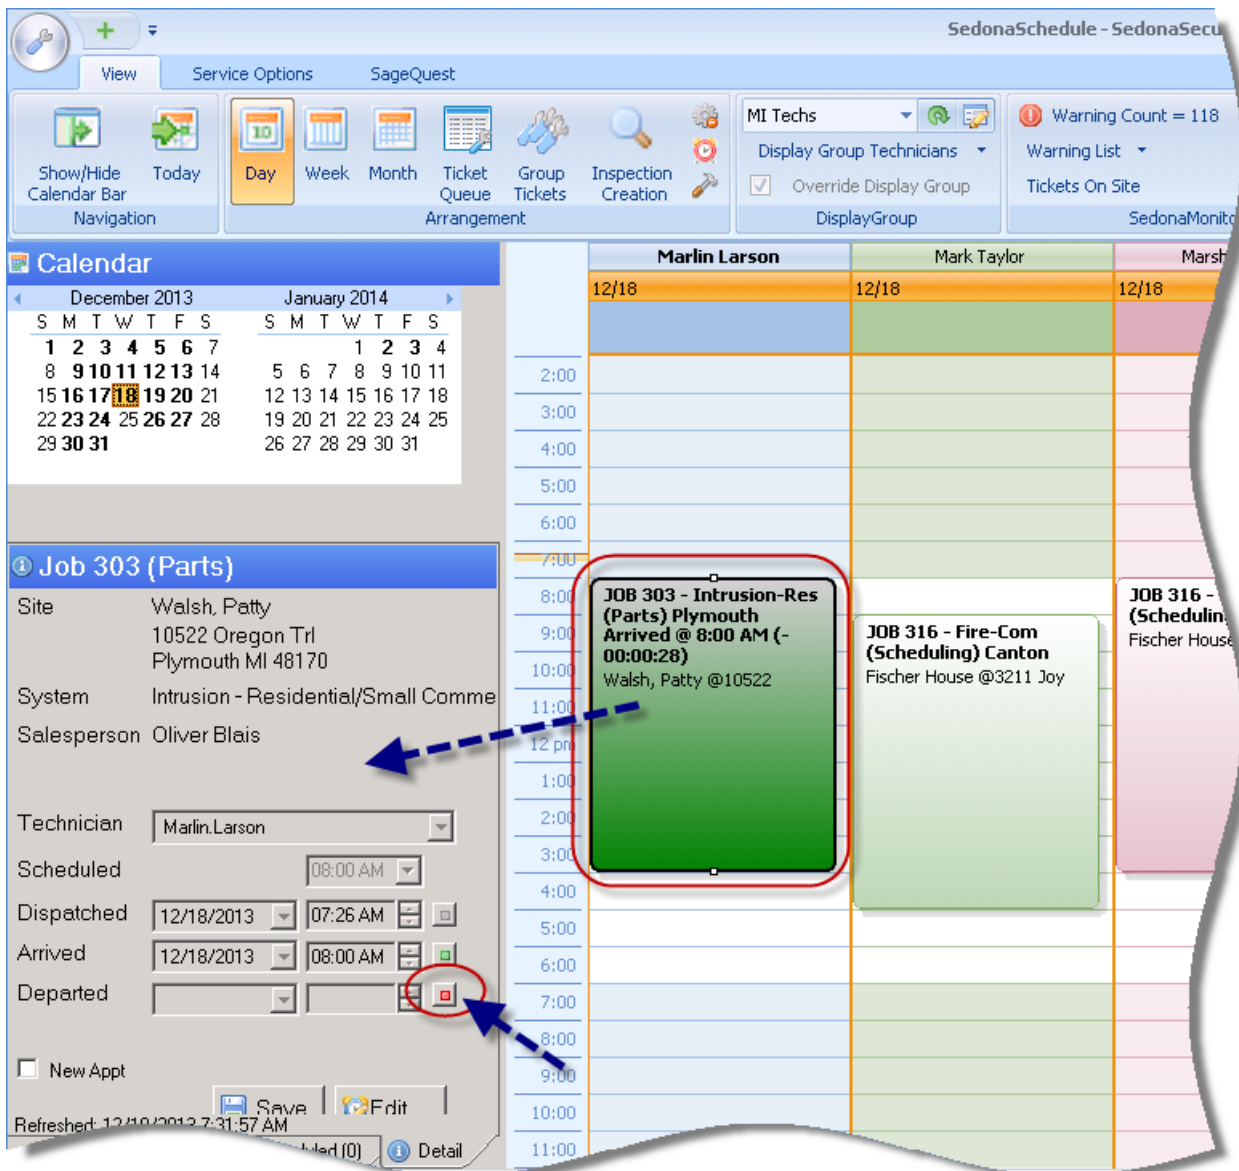

The calendar shows December 2013 and January 2014. The job details panel for 'Job 303 (Parts)' includes the following information:

- Site: Walsh, Patty
- Address: 10522 Oregon Trl, Plymouth MI 48170
- System: Intrusion - Residential/Small Comm
- Salesperson: Oliver Blais
- Technician: Marlin.Larson
- Scheduled: 08:00 AM
- Dispatched: 12/18/2013 07:26 AM
- Arrived: [empty]
- Departed: [empty]

The dispatch board shows a grid of time slots (2:00 to 11:00) for three technicians: Marlin Larson, Mark Taylor, and Marshall Watson. A blue job card for 'JOB 303 - Intrusion-Res (Parts) Plymouth' is highlighted, showing it was dispatched at 7:26 AM. A green dispatch button is visible in the bottom right corner of the job details panel.

Live Dispatching (continued)

- Once the employee has completed the Job Appointment, from the Schedule Board, click on the Job Appointment to be dispatched and then click on the  red dispatch button.

The screenshot displays the SedonaSchedule software interface. On the left, a calendar shows the transition from December 2013 to January 2014. Below the calendar, the 'Job 303 (Parts)' details are visible, including the site (Walsh, Patty), system (Intrusion - Residential/Small Comm), salesperson (Oliver Blais), technician (Marlin Larson), and scheduled time (08:00 AM). The 'Dispatched' field shows the date 12/18/2013 and time 07:26 AM. The 'Arrived' field shows the date 12/18/2013 and time 08:00 AM. A red square button with a white 'X' is circled in the 'Departed' field, with a blue arrow pointing to it from the job details section. The main area of the interface is a dispatch board with columns for technicians: Marlin Larson, Mark Taylor, and Marsh. The board shows a grid of time slots from 2:00 to 11:00. A green box highlights the job appointment for Marlin Larson on 12/18, with a blue arrow pointing to it from the job details section. The job details box contains the text: 'JOB 303 - Intrusion-Res (Parts) Plymouth Arrived @ 8:00 AM (-00:00:28) Walsh, Patty @10522'. Other jobs visible include 'JOB 316 - Fire-Com (Scheduling) Canton' and 'JOB 316 - (Scheduling) Fischer House'.

Manual Dispatching

To Manually Dispatch a Job Appointment, follow the steps below.

1. From the Schedule Board, click on the Job Appointment to be dispatched then click on the

Edit button in the Information Viewer area.

The screenshot displays the SedonaSchedule - SedonaSecurity 5.6.200 interface. The top menu bar includes 'View', 'Service Options', and 'SageQuest'. Below this is a toolbar with icons for 'Show/Hide Calendar Bar', 'Today', 'Day', 'Week', 'Month', 'Ticket Queue', 'Group Tickets', 'Inspection Creation', and 'MI Techs'. The 'Day' view is selected, showing a calendar for December 2013 and January 2014. The 'Job 316 (Scheduling)' details are visible on the left, including Site (Fischer House), System (Fire - Large Commercial), Salesperson (Matt Miller), Technician (Mark Taylor), and Scheduled time (09:00 AM). The 'Edit' button is highlighted in the bottom right corner of the job details panel. The main area shows a schedule board with columns for technicians: Marlin Larson, Mark Taylor, and Marshall Watson. The 'JOB 316 - Fire-Com (Scheduling) Canton' is highlighted in the Mark Taylor column, with a red dashed arrow pointing to the 'Edit' button.

Manual Dispatching (continued)

2. The *Job Dispatch* form will be displayed. Type in the Dispatched, Arrived and Departed times, then click on the *Save* button located at the lower right of the form.
